EDUCATION

University of Bern <i>Ph.D. Biostatistics and Epidemiology</i>	Bern, Switzerland 2019 - 2022
Brown University <i>M.A. Biostatistics; GPA: 3.6/4.0</i>	Rhode Island, USA 2015 - 2017
Stanford University <i>M.S. Statistics; GPA: 3.7/4.0</i>	California, USA 2012 - 2014
Duke University <i>B.S. Statistics, Graduation with High Distinction; GPA: 3.7/4.0</i>	North Carolina, USA 2007 - 2011

WORK EXPERIENCE

Roche <i>Access Evidence Lead (HTA Statistician)</i>	2022 - Present <i>Basel, Switzerland</i>
<ul style="list-style-type: none">• Drafted indirect treatment comparisons (ITC) statistical analysis plans and reports needed for the HTA reimbursement submissions.• Worked with Phase II/III clinical trials data to implement ITC methods such as matching-adjusted indirect comparison (MAIC) and inverse probability of treatment weighting.• Developed an R package for MAIC which implements comprehensive analyses and visualization tools, including anchored comparisons and bootstrap variance estimators.	
Institute of Social and Preventive Medicine, University of Bern <i>Ph.D. Student in Biostatistics and Epidemiology</i>	2019 - 2022 <i>Bern, Switzerland</i>
<ul style="list-style-type: none">• Compared variable selection and shrinkage methods for estimating patient-specific treatment effects in individual patient data meta-analysis.• Developed models that combine individual patient data from randomized controlled trials and observational studies when aiming to predict outcomes for a set of treatments.• Explored methods of addressing the systematically missing predictors problem, when the aim is to build a prediction model using data from multiple studies.	
LLX Solutions <i>Biostatistician</i>	2018 - 2019 <i>Massachusetts, USA</i>
<ul style="list-style-type: none">• Drafted statistical analysis plans for Phase I trials which address study designs and methods on how to evaluate safety of the new drug in development.• Transformed raw clinical data into datasets that meet FDA standards using PROC SQL.	
Department of Biostatistics, Brown University <i>Ph.D. Student in Biostatistics</i>	2015 - 2017 <i>Rhode Island, USA</i>
<ul style="list-style-type: none">• Developed an R package for Bayesian network meta-analysis which allows simultaneous comparison of multiple treatments.• Developed a Bayesian statistical tool to analyze single patient trials with crossover design and applied it to give individualized recommendations of carbohydrate diet for patients with inflammatory bowel disease.	

SKILLS

Programming: R, Python, SAS

Statistics: indirect treatment comparison, network meta-analysis, causal inference
